Team Contract

Contact Information

- Jessica Cvetkovska – cvetkojr@mail.uc.edu
- Monica Escobedo Barahona – escobema@mail.uc.edu
- Aiden Frank – frankai@mail.uc.edu

Team Meeting Frequency

- Twice per week
- One hour maximum
- After automata class (Tuesday) and online Thursday 5PM

Project Focus

Packing Pal is a tool designed to help people conveniently formulate and share highly customized packing lists built with React and utilizing AI technology. The tool will be accessible on the web and built for computer use first. The tool will be built with the React library and utilize a database. It will also have some AI components to help with creating lists, the extent of which is still TBD. The ability to quickly share lists in different formats will also be a focus. The project will be designed first for camping trips but may be expanded to other types of trips in the future.

Role of Each Team Member

- Jessica Cvetkovska:
  - Backend Developer
- Monica Escobedo Barahona:
  - Frontend Developer
- Aiden Frank:
  - Developer
